SUMMARY

My name is Daniel Njeru. I am a Data Scientist with experience in data acquisition, modeling, statistical analysis, and machine learning. I am passionate about transforming data into actionable insights that drive business growth, improve decision-making, and optimize operations. At my core, I am an educator, guided by a deep commitment to learning and teaching. I broke into tech as a Software Developer and have continuously grown my craft in pursuit of purposeful impact. I am particularly eager to build my career within banking, where data, innovation, and strategy intersect to shape financial inclusion and business transformation. My other skills include digital marketing and research. I am currently pursuing a Master of Science in Data Science at KCA University. As an intellectually curious person, my goal is to advance in data science and research while contributing meaningful innovations to the financial sector.

SKILLS

- Programming and Data Manipulation
- Statistical Analysis and Modeling
- Data Visualization and Reporting
- Machine Learning and AI
- Problem Solving and Critical thinking

EXPERIENCE

AI Trainer | Telus Digital

07/01/2023 - Present | Remote

- Annotated and labeled large datasets to train and refine AI and machine learning models.
- Evaluated and rated AI-generated responses for accuracy, relevance, and tone to improve model performance.
- Contributed to Reinforcement Learning from Human Feedback (RLHF) workflows by assessing AI outputs and providing structured feedback.
- Ensured data quality, consistency, and compliance with project guidelines and ethical standards.
- Collaborated with cross-functional teams to improve data labeling guidelines and optimize annotation efficiency.
- Conducted quality assurance checks to maintain high data integrity for model training pipelines.
- Used data annotation tools and platforms to manage and process large volumes of unstructured data (text, images, or conversations).
- Participated in iterative model evaluation cycles, helping enhance AI comprehension, reasoning, and natural language performance.

Key Accomplishment:

- Conducted quality assurance on large datasets, ensuring 99% data integrity and compliance with project guidelines and ethical standards.

Digital Marketing Manager | Bountiful Safaris

15/09/2022 – 09/12/2022 | Nairobi

- Developed and executed the company's digital marketing strategy to drive awareness, engagement, and bookings.
- Managed and optimized social media marketing campaigns on Facebook, Instagram, TikTok, and YouTube
- Implemented SEO and SEM strategies that improved search rankings and website traffic.
- Monitored and analyzed campaign metrics and customer data to optimize marketing performance.
- Used insights from Google Analytics, Tag Manager, and CRM systems to guide decision-making.
- Introduced new content formats and engagement campaigns tailored to travel audiences.

Key Accomplishment:

- Managed and optimized social media campaigns across Facebook, Instagram, TikTok, and YouTube, growing follower engagement by 40%

Web Developer/Web Content Manager | Mingo.io

05/09/2021 – 10/12/2022 | Remote

- Fixing broken links, resolving site-errors, ensuring 404s are handled properly.
- Managing site structure: internal linking, site navigation, ensuring content is well organized so search bots crawl efficiently.
- Keeping up with SEO algorithm changes, best practices, and implementing updates (e.g. optimizing for Core Web Vitals, mobile first indexing).
- Monitoring website analytics (traffic, bounce rate, session times) and reporting on performance.
- Conducted keyword research around MongoDB tools and database management to target relevant search terms.
- Wrote and updated documentation for MongoDB users, covering features like aggregation builders, indexes, schema analysis, and query optimization.
- Translated complex database and app features into clear, user friendly guides and tutorials.

Key Accomplishments:

- Conducted targeted keyword research for MongoDB tools and wrote user-friendly documentation, tutorials, and guides, increasing content-driven search visibility by 40%.
- Resolved 100+ broken links and site errors, reducing 404 pages by 95% and improving user experience and crawl efficiency.

Web Developer | Freelance

01/03/2018 – 01/05/2020 | Remote

- Designing, coding, and modifying websites or web apps.
- Translating client or project requirements into technical solutions.
- Testing and debugging websites to ensure smooth functionality.
- Deploying websites to production environments (hosting servers, cloud platforms).
- Writing documentation and user guides.

Key Accomplishments:

- Translated client requirements into technical solutions, delivering projects on time and meeting 100% of agreed specifications.
- Managed deployment to production environments on hosting servers and cloud platforms, achieving 99% uptime post-launch.

EDUCATION

KCA University | Masters of Science in Data Science

05/01/2026 – 2027

I am currently pursuing a Masters Degree in Data Science majoring in Data Engineering. I will be completing my coursework in December 2026.

Kenyatta University | Bachelor of Education (Science)

08/08/2014 – 20/02/2018

Second class upper

I majored in Mathematics and Physics, which gave me a strong background in problem solving, logical thinking, and scientific analysis.

Moringa School | Data Science Certification

11/08/2025 – 27/02/2026

I completed an intense Nanodegree in Data Science at Moringa School in February 2026.

The London App Brewery | Full Stack Developer

10/03/2020 – 15/10/2020

I attended an online Bootcamp at The London App Brewery, where I gained hands on skills as a Full Stack Web Developer.

ALX | Software Engineer

10/02/2022 – 10/02/2023

I attended ALX to study Software Engineering, where I learned how to design, build, and maintain software systems.
